

Vibrant Health® is a brand for those seeking vibrant health. Our promise is to design and market the most nutritionally valuable food supplements we can for the benefit of all men, women, and children. Delivering on that promise is a serious endeavor, and we work diligently toward that end for you.

Vibrant Health's products provide supplemental nutrition that can support human biochemistry. Since the human body appears to carry a certain infinite wisdom, the establishment of optimum health often follows appropriate dietary improvements. The steady decline in trace nutrient value of our fresh foods — as evidenced in the U.S. Department of Agriculture's analyses of our food supply — has, in the opinion of Vibrant Health, established a mandate for supplemental nutrition. We believe supplemental nutrition is no longer an option, it is a necessity if one hopes to achieve robust and vibrant health.

In the category of green foods, our **Green Vibrance®** was the first green superfood introduced into health food stores in 1992. Since that time, **Green Vibrance®** has undergone eight reformulations in order to incorporate the latest nutritional materials that will enhance the underlying rationale of **Green Vibrance®**. We have addressed joint health in the same way, introducing **Joint Vibrance®** in 1995. **Joint Vibrance®** is the most comprehensive formula for the support of joint health, and includes botanical ingredients synergistic to the nutritional roles of Glucosamine and Chondroitin sulfate (CSA), MSM and Arthred™ hydrolyzed collagen.

The urinary tract is addressed with **U.T. Vibrance**, a formula based on d-mannose and complementary botanical ingredients. Our patented **Cran-Max™** capsules are recommended as regular, daily supplemental nutrition for urinary tract health. Its broad range anti-oxidant properties also make it valuable as a general nutritional supplement.

Curcuminoids from standardized turmeric extract are found in two potencies in the Vibrant Health® line, 250 mg. **Curcuminoid-95+** and **Maximized Curcuminoids** at a strength of one gram per tablet. More anti-oxidants are found in **Life Preserver™**, our multiple antioxidant formula that goes far beyond the standard A, C, E and Zinc to incorporate alpha-lipoic acid, CoQ10 plus a full range of water soluble, fat soluble, botanical and mineral antioxidants. We have yet to see any other antioxidant formula that is so complete or presents so bold a position of support for cellular health.

Our combination of soy phytosterols (i.e., beta-Sitosterol, Stigmasterol, Campesterol, Brassicasterol, Ergostanol, Stigmastanol, etc.) and policosanol in pleasant, chewable **Enhanced Cholesterol Blocker** wafers delivers plant substances known to be effective in blocking absorption of dietary cholesterol with potential benefits to blood cholesterol levels. Our Glycemic Vibrance L and Glycemic Vibrance H products provide trace and macronutrients that may support normal blood sugar levels within the normal range.

Tocotrienols, the more biochemically active cousins of vitamin E, have now expanded our understanding of the vitamin E complex. Vibrant Health® offers **Oryza "Rice" Oil Tocotrienols**, a beautifully balanced tocotrienol product that delivers significant potencies of all four tocotrienols: alpha, beta, gamma and delta. The primary source is rice (*Oryza*) bran oil.

Our quest for the plant with the greatest biomass of sulfated polysaccharides led us to red marine algae and the family Gigartinaeae. Several of these Gigartina red marine algae have shown themselves to be the best sources yet discovered of sulfated polysaccharides. Vibrant Health's **Gigartina Red Marine Algae** combines the five strains of Gigartina shown to deliver the most sulfated polysaccharides.

A costly extract of our algae isolates the sulfated polysaccharides of **Gigartina Red Marine Algae** into what we call RMA extract. We then incorporate the extract into a unique ointment based on emu oil with herbs and essential oils. The result is **RMA Ointment**, a quiet little product with ability to soothe skin.

Plants can be the source of many key nutrients. Vibrant Health® has turned to them as the source for highly bioavailable trace minerals. The marriage of science and nature has given us specially cultivated Indian mustard (*Brassica juncea*) raised hydroponically to provide elevated, completely natural levels of certain minerals. Our first two are **Phyto-Selenium** and **Phyto-Chromium**. Both are typically undersupplied in today's diet.

Our newest phyto mineral is a patented calcium fructo-borate, a form of boron found in plants. The patent for the material in our **Phyto-Boron** confirms its ability to support normal levels of hormonal Vitamin D and testosterone. Keeping these hormones at optimal levels helps maintain bone health, as has long been known.* Every mammalian species tested, in fact, has shown improved calcium retention and strengthened bone tissue under supplemental doses of boron that would equate to 3 milligrams daily in humans. Current estimates place the daily dietary intake of boron from food at 1 to 1.25 mg.

But where can one find a good source of bioavailable calcium? Another plant, Hydrilla verticillata, is a fine source. This fresh water, rooted plant from Florida, harvested in protected ponds in the north central part of the state happens to provide around 700 milligrams in every 4.75 grams of powder (one tablespoon) or 4 to 5 tablets. We call it **Green Calcium**.

Vegetarians take note: Hydrilla is not only a wonderful source for calcium but is loaded with a full range of B-vitamins, most at levels far higher than chlorella. Hydrilla, the sole component of Green Calcium, is a nutritional powerhouse that should not be overlooked.

50% of your body's immune cells line the intestinal tract. They're your first line of defense in your immune system. Our **First Defense** links bovine serum immunoglobulins (a more concentrated source than colostrum) with arabinogalactans, RMA extract and beta glucans in a powerful immune support formula.

Zinc is an important support nutrient for immunity too - and for many other structures and functions. Without enough of it, we can't grow, repair damaged tissue, digest food, taste food, smell anything and carry on over 380 other enzymatically controlled bodily functions.* We thought zinc was a fine place to start building a line of mineral supplements. **A Man's Zinc** joins zinc arginate with soy sterols. **Kreb's Zinc** offers a general purpose supplement of the full Krebs complex zinc for the entire family.

Watch for these: Visit our site often. We have more new and stunning supplements planned for you. Our focus is to deliver truly effective health support to the consumer. **Bone Vibrance** will protect skeletal health. And if your world is a little hectic, **Wits End** may bring some peace, or at least nutritionally support the biochemistry that comes into play during periods of stress.
